DOON BUILDERS

SINCE 1968

Website Documentation

This document covers the Doon Builders website: where the code lives, how it is built and deployed, the technology and source code used, the full colour palette and typography, the pages, media and content, and the current status.

LIVE WEBSITE
doonbuilders.in

CODE REPOSITORY
doonbuildersdigital/doonbuilders

DOCUMENT DATE
14 October 2026

OVERVIEW

01 Website at a glance

The Doon Builders website is the corporate site of a three-generation construction and infrastructure company (est. 1968). It presents the company's history, government and private projects, machinery, on-site work and contact options, with a dark/light theme and smooth animation throughout.

Website	https://doonbuilders.in (also www.doonbuilders.in)
Netlify address	https://doonbuildersofficial.netlify.app
Code repository	https://github.com/doonbuildersdigital/doonbuilders (branch `main`)
Hosting	Netlify — project **doonbuildersofficial**
Domain registrar	BigRock (doonbuilders.in)
Email	Titan Email on the doonbuilders.in domain
Type of site	Single-page application (React) built to static files
Pages	9 pages + project detail pages + 404 page

CODE & HOSTING

02 Repository, hosting and domain

Code repository (GitHub)

ITEM	VALUE
Repository	`github.com/doonbuildersdigital/doonbuilders`
Owner account	doonbuildersdigital (GitHub)
Production branch	`main` — every push to `main` deploys the live website automatically
Clone	`git clone https://github.com/doonbuildersdigital/doonbuilders.git`

Hosting (Netlify)

ITEM	VALUE
Netlify account	Doon Builders — doonbuilders.digital@gmail.com
Project	**doonbuildersofficial** — app.netlify.com/projects/doonbuildersofficial
Build command	`npm run build`
Publish folder	`dist`
Auto-deploy	GitHub push webhook + read-only deploy key on the repository
Routing	`/* → /index.html (200)` in `public/_redirects`, so every page URL works on refresh

Caching	`/assets/*` cached 1 year (immutable); `/images/*` cached 7 days — set in `netlify.toml`

Domain and DNS (BigRock)

The domain stays on BigRock's nameservers so that Titan Email keeps working. Two records point the website to Netlify:

TYPE	HOST	VALUE	PURPOSE
A	`@` (doonbuilders.in)	`75.2.60.5`	Main domain → Netlify
CNAME	`www`	`doonbuildersofficial.netlify.app`	www → Netlify
MX	doonbuilders.in	`mx1.titan.email`, `mx2.titan.email`	Email — do not change
TXT	doonbuilders.in	`v=spf1 include:spf.titan.email ~all`	Email — do not change
NS	doonbuilders.in	`dns1-dns4.bigrock.in`	Do not change

Netlify issues the free SSL certificate (Let's Encrypt) for https automatically once both records resolve.

TECHNOLOGY

03 What the website is built with

The site is written in **JavaScript (JSX)** with **React**, bundled by **Vite** and styled with **Tailwind CSS**. All libraries are open-source and installed from npm.

PACKAGE	VERSION	USED FOR
react, react-dom	19.3	User-interface library — every page and section is a React component
react-router-dom	7.18	Page routing (Home, Projects, Contact …) without full page reloads
vite	8.3	Development server and production build (Rolldown bundler)
@vitejs/plugin-react	6.1	React / JSX support and fast refresh in Vite
tailwindcss	3.4	Utility-first CSS framework — all styling, colours, spacing
postcss, autoprefixer	8.5 / 10.6	CSS processing and browser prefixes
gsap, @gsap/react	3.15 / 2.1	Animations: hero entrance, scroll reveals, parallax, counters
lenis	1.3	Smooth scrolling
lucide-react	1.49	Line icons (arrows, phone, play/pause, menu …)

Tools needed to work on the code

- **Node.js** (LTS) with npm — runs the build

- **Git** — to clone and push the repository
- Any code editor (VS Code recommended)

Commands

```
# install dependencies (first time)
npm install

# run locally at http://localhost:5173
npm run dev

# production build into dist/
npm run build

# preview the production build
npm run preview

# publish a change (Netlify deploys automatically)
git add -A && git commit -m "Describe the change" && git push origin main
```

SOURCE CODE

04 Source code structure

About 72 source files (~6,700 lines). Content such as phone number, projects and machinery is kept in `src/data/`, so text can be changed without touching the page layout.

```
doonbuilders/
├── index.html              page shell, fonts, theme script, meta tags
├── package.json            dependencies and npm scripts

Where to change common content

TO CHANGE…	EDIT THIS FILE
Phone, WhatsApp, email, stats, address, social links	`src/data/company.js`
Projects (name, status, category, images)	`src/data/projects.js`
Machinery list	`src/data/machinery.js`
Image files used on each page	`src/data/images.js`
Menu links	`src/data/navigation.js`
Page titles / descriptions for Google	`src/data/seo.js`
Timeline / history	`src/data/timeline.js`, `src/data/archive.js`
Colours and fonts	`tailwind.config.js`, `src/styles/globals.css`

DESIGN

05 Colour palette

The brand is built on a deep construction red with near-black and cool greys. Fixed colours look the same in both themes; theme colours switch between light and dark mode.

Brand and fixed colours

Brand Red
#C8102E
Buttons, highlights, logo bar, links

Brand Deep
#A50E27
Button hover, blessing strip

Brand Bright
#E8475B
Red text on dark backgrounds ("since 1968.")

Gold
#F7D774
Hindi blessing text on red

Night
#111214
Hero background, image overlays

Charcoal
#181A1D
Dark cards and panels

WhatsApp Green
#25D366
Floating WhatsApp button

White
#FFFFFF
Text on dark / red backgrounds

Theme colours — light and dark mode

TOKEN	USED FOR	LIGHT MODE	DARK MODE
ink	Main text	#111214	#ECEDF0
paper	Page background	#F6F7F9	#0D0E10
surface	Cards, navbar, panels	#FFFFFF	#181A1D
mist	Image placeholders, soft fills	#E6E8EC	#2C2F34
steel	Secondary text, labels	#777B80	#9499A0
steel-dark	Body copy, captions	#55595E	#B2B7BE
line	Borders, dividers	rgba(20,20,20,0.12)	rgba(255,255,255,0.11)
brand-text	Red text	#C8102E	#F05468

The theme follows the visitor's device setting by default; the moon/sun button in the header switches it and the choice is remembered.

Other design values

ELEMENT	VALUE
Card shadow	soft layered shadow; red glow (`rgba(200,16,46,0.55)`) under red buttons
Corner radius	buttons fully rounded; cards 16–36 px

Page width	max 1440 px; side gutter 20 px (mobile) → 32 → 48 → 80 px (large screens)
Header height	blessing strip 44–52 px + navbar 68–76 px
Animation easing	`cubic-bezier(0.22, 1, 0.36, 1)`
Label letter-spacing	0.18em, uppercase

DESIGN

06 Typography

Building India since 1968.

Poppins — headings 700–800, body 400–500, buttons and labels 600.

ॐ भगवान श्री टपकेश्वर महादेव जी की कृपा से ॐ

Noto Serif Devanagari 600 / 700 — Hindi blessing strip at the top of every page.

FONT	WEIGHTS	SOURCE
Poppins	400, 500, 600, 700, 800	Google Fonts (free, Open Font License)
Noto Serif Devanagari	600, 700	Google Fonts (free, Open Font License)
Fallbacks	—	system-ui, Segoe UI, Roboto, Arial · Nirmala UI, Mangal

STRUCTURE

07 Pages and home page sections

PAGE	ADDRESS	CONTENT
Home	`/`	Hero video, stats, legacy, projects, capabilities, machinery, gallery, contact call-to-action
Projects	`/projects`	All 16 projects with category filters
Project detail	`/projects/<name>`	One page per project, with next-project link
Ongoing Projects	`/ongoing-projects`	3 projects under execution + real site photos
Projects Delivered	`/projects-delivered`	13 completed projects
Experience	`/experience`	Timeline 1968 – today, original records, sectors (infrastructure, government, private)
Machineries	`/machineries`	Fleet of 7 machinery types with filters
About Us	`/about`	Three generations, original records, company details
Contact	`/contact`	Enquiry form (sent to Netlify Forms + email), call, WhatsApp, email
Not found	any other address	Friendly 404 page

Project categories

Roads & Highways (3) · Hospitality (3) · Dams (2) · Irrigation (2) · Bridges · Railways · PWD · Healthcare · Commercial · Project Management — 16 projects in total (13 completed, 3 ongoing).

Home page sections (in order of the code)

Hero · Stats · Legacy · Generations · Government Projects · Private Projects · Featured Projects · Capabilities · Showcase · Machinery Preview · Site Gallery · Why Doon · Final CTA.

Features on every page

- Fixed header with Hindi blessing strip, menu and "Discuss a Project" button; full-screen mobile menu
- Floating call and WhatsApp buttons (+91 89230 76963) and back-to-top button
- Light / dark theme toggle
- Opening intro animation, scroll animations and smooth scrolling — reduced automatically for visitors who turn off motion in their device settings
- Image lightbox for galleries and archive records
- Page titles and descriptions for Google and social sharing

MEDIA

08 Images, video and credits

Home page video

FILE	QUALITY	SHOWN ON
`hero-construction-720.mp4`	1280×720 · 5 MB	Phones
`hero-construction-1080.mp4`	1920×1080 · 11 MB	Laptops and desktops
`hero-construction-2160.mp4`	3840×2160 (4K) · 25 MB	Large screens (2200 px+) and high-resolution laptops
`hero-construction-poster.webp`	1920×1080	Still frame shown while the video loads

14-second muted loop, colour-graded brighter and sharpened. It pauses when scrolled out of view and has a play/pause button.

Images

FOLDER	WHAT IT HOLDS
`images/site/`	Real Doon Builders site photos (rebar inspection, column reinforcement, shuttering, concreting)
`images/archive/`	Scans of original company records (Dewas 1976, Tarana 1980, Kolar 1990, Dubai 2023)
`images/placeholder/`	Representative photos for project and section images
`images/stock/`	Representative machinery and site photos

Every image is saved in two modern formats — **AVIF** and **WebP** — at 640, 1280 and 1920 px wide (480 / 960 px for portrait site photos). The browser downloads only the size the screen needs. Photos were brightened, colour-boosted and sharpened for display.

Credits and licences

SOURCE	USED FOR	LICENCE
Pexels #38588308	Home hero video	Pexels Licence — free, no credit required
Unsplash	Rebar workers, site engineers, skyscrapers, placeholder photos	Unsplash Licence — free, no credit required
Wikimedia Commons	Bulldozer, road roller, backhoe, grader, paver, concrete pump, mobile crane, dump truck	CC0 / public domain
Wikimedia Commons	Gandhi Sagar Dam (photo by LRBurdak)	CC BY-SA 3.0 — credit required
Google Fonts	Poppins, Noto Serif Devanagari	SIL Open Font License
Lucide	Icons	ISC licence

Full list with links: `public/images/stock/CREDITS.md` . Stock images are marked "Representative image" on the site.

ENQUIRIES

09 Contact form and enquiries

The enquiry form on the Contact page (`/contact`) sends every submission to **Netlify Forms**. Each enquiry is saved in the Netlify dashboard and also emailed to the company.

View enquiries	app.netlify.com/projects/doonbuildersofficial/forms → form **contact**
Email alerts to	**doonbuilders.digital@gmail.com** — one email per enquiry, sent by Netlify
Netlify login	doonbuilders.digital@gmail.com (Doon Builders account)
Form name	`contact`
Fields	Name*, Company, Phone*, Email*, Project Type, Project Location, Message (* required)

SETTING	WHERE / VALUE
Form provider	Netlify environment variable `VITE_CONTACT_PROVIDER = netlify`
Form detection	Enabled — Netlify → Forms
Email notification	Netlify → Project configuration → Notifications → Form submission notifications
Form definition in code	Hidden form in `index.html` ; visible form in `src/components/ContactForm.jsx` ; sending logic in `src/services/contactService.js`
Spam protection	Hidden honeypot field (`bot-field`) + Netlify spam filter
Monthly limit	100 submissions per month on Netlify's free plan
Other ways to reach	Call / WhatsApp +91 89230 76963 (buttons on every page)

If an email alert does not arrive, check the Spam / Promotions folder and mark the Netlify email as "Not spam".

STATUS

10 Current status

ITEM	STATUS	NOTE
Code on GitHub (doonbuildersdigital/doonbuilders)	Done	Branch `main`
Netlify deploy + auto-deploy from GitHub	Done	Every push to `main` goes live
Site protection removed (public access)	Done	—
DNS records at BigRock (A + CNAME)	Done	Email records untouched
SSL certificate (https://doonbuilders.in)	Done	Free Let's Encrypt certificate, renewed automatically by Netlify
Contact form (Netlify Forms)	Done	Enquiries saved in Netlify and emailed to doonbuilders.digital@gmail.com
